EXPERIENCE

GMetrix LLC, Lindon, UT — *Software Engineer*

NOV 2019 - PRESENT

- Develop and maintain the direction of the elearning software. I also provide test cases for our QA team and implement design changes and layouts
- Develop Microsoft Office product simulations using the Unity software. Help in building out educational quizzes and test questions for students and users in the simulations.
- Develop features and products using popular full stack technologies such as Reactjs, Nodejs, ASP.net, C# .Net Core, Azure DevOps and more.

Bright Bridge Web LLC, Provo, UT — *Full Stack Web Developer*

OCT 2018 - NOV 2019

- Was lead developer in design, development, and deployment of mobile apps and websites that ranged from custom build to wordpress websites.
- Weekly communication with clients, managed git repositories, and sent a detailed weekly report to clients for project progress.
- Used popular technologies such as Python, Django, Reactjs, Postgres, Redux, React Native, and Swift.

EDUCATION

Dev Mountain, Salt Lake City, UT — *iOS Immersive Bootcamp*

MAY 2018 - AUG 2018

Over a course of 13 weeks, we learned major concepts of app development such as architecture, data, submitting apps to the App Store, app design, xcode IDE, programming concepts using Apple's Swift programming language and most importantly, debugging.

SKILLS

Proficient in the following technologies:

- Javascript
